MEMORANDUM FOR: Mr. Huntington Sheldon

**SUBJECT: Granting of Reciprocal Radio Communications
Rights to Selected Foreign Governments**

1. Attached is a memorandum for the Director, subject as above, together with a staff study on the subject, which requires the comment or concurrence of the DD/I. I thought it desirable to make it available to you before sending it to Mr. Amory.

2. This problem has been discussed in government agencies at one time or another during the past many years without ever arriving at any solution. I believe that you will find it evident after reading the memorandum to the Director and the staff study, the interest which CIA has in this matter.

3. Recently a representative of the FBI, in discussing a variety of matters with the Director, mentioned that he understood a study of this subject was in progress within the Agency and that he understood that the Agency was much interested in it. Mr. [] called me inquiring about it as this was the first that the Director had heard of it. He called me again this morning asking when it would reach the Director and I told him that I was sending it to him after sending it to you and Mr. Amory.

4. After you have studied it, will you please pass it on to Mr. Amory for his action.
